### Women's Institute Former Champion Resident Passes Away

On June 13th the Champion Women's Institute entertained all the neighboring branches at their "Alberta Products" meeting. Mrs. Ulrich is chairman of this committee and due to the energetic efforts and the co-operation of all the members and ex-members, the meeting was an outstanding success.

Mr. H. Stutzbach, Trade Commissioner talked on "Buy in Alberta," when he was praising the community hall and the excellent organizing abilities of Women's Institutes. Mr. McKay, secretary of the Retail Merchants Association, was advocating the same cause and had slides exhibiting the trade marks of Alberta manufacturers. Miss Ferguson gave two charming violin solos. Mr. Campbell sang "A Friend" and "A Wee House."

After "God Save The King" all descended to the delightfully cool dining room where Mrs. Latif and her cohorts had tables beautifully spread for one hundred. In addition to the sandwiches, cakes, pickles, etc., the visiting gentlemen providing I.B.C. biscuits, tuxedo coffee and blue willow tea.

Work has commenced on a swimming hole for Champion and district at the Bar U. ranch. The Elks are sponsoring the project and when they finish they expect to have a pool that will not be excelled in Southern Alberta, with apologies to Henderson and Waterton.

An unusually pleasant evening was spent on Monday by the O.O.R.P., the occasion being the official visit of Mrs. Gibson of Calgary, Provincial Deputy of the O.O.R.P. Mrs. Gibson complimented the lodge on their work, finding everything in the best of order. During the evening Mrs. Gottenburg was appointed delegate to the convention to be held in Trail B.C. in July. During her stay here Mrs. Gibson was the guest of Mrs. W. McRae.

K. R. McLean, R.O., of McLean & Anderson, Sight Specialist of 224-8th Ave West, Calgary, will make his monthly visit to Champion, Friday, June 23rd at the Drug Store.

Josephine Perry, 33 years of age, pioneer of Champion and wife of Athelney Perry, of Blackie, died in High River, Monday evening.

The late Mrs. Perry had resided in Blackie for the past three years. She was born in Walkerton, Ont., and came to Champion more than 20 years ago. In 1914 she married Athelney Perry.

She leaves her husband, three sons, Clarence, Ray and Irvine, three daughters, Irene, Florence and Doris, all at home, a sister, Mrs. Marie Schutroski, in Calgary, four sisters in Ontario and two brothers, Tony Kramer in Champion, and Wilfred Kramer in Exeter.

Funeral services with requiem mass was held in the Sacred Heart church at Brant at 11 o'clock Wednesday morning. Rev. Father Bowlen officiated and burial was made in the Brant cemetery. The Snodgrass funeral home, High River was in charge of arrangements.

A number of the members of the O. E. S. surprised Mrs. J. N. Beaubier on Wednesday evening, June 21, the occasion being Mrs. Beaubier's birthday. A very enjoyable social evening was had by all present, after which delicious refreshments were served.

An unfortunate accident occurred when the son and daughter of Jasper Root were thrown from the horse they were riding resulting in both children breaking an arm. The little girl's injury was very severe.

An interesting ball game was played at Barons on Tuesday evening when the Champion team took Barons to a 7-5 trimming. It was a good game from start to finish. Batteries: Champion, Luehia, McCullough; Barons, Lyons, Hodges.

### Card of Thanks

A. M. Perry and family of Blackie wish to thank their many friends and neighbors for the kindness shown in their recent sad bereavement.

Mrs. Harry Smith and Mervin who have spent the past three weeks visiting in Toronto and Oakville returned to Champion Saturday. Mrs. Smith reports a very enjoyable trip, finding everything in that part of the country at its height in beauty.

### Elks Attention!

# Old Convict Ship "Success" Is Interesting Exhibit Shown At Century Of Progress Fair

A 143-year-old convict ship that once spent five years at the bottom of Sydney Harbor, Australia, and then sailed the Atlantic under her own canvas, is the year's "Feature Attraction" at the front of Chicago as an exhibit of the Century of Progress Exposition.

The vessel, the old "Success," a merchantman before she was fitted out with cells and instruments of torture, is believed to be the oldest ship afloat.

Aboard her are the almost artless dungeons, the condemned cells, whipping posts, manacles, branding irons, punishment blocks, the leaden-tipped cat-o'-nines tails and the like. The craft is in excellent uncharted order after all these years, nothing being omitted but the human freight.

The "Success" was first launched as an armed East India merchantman, with benches, gun galleries, fitting rooms, sides and roof hand-somely for the reception aboard of princes, nabobs, and wealthy traders of the Orient, whose spic, teas, ivories and jewels she carried over the seas to all parts of the world. Broken up by an eccentric conflict with a pirate, the "Success" had an honored life of the ocean until 1802, when she was first chartered by the British Government to transport to Australia some classes of offenders from the home jails, who, at that time, were sentenced to from seven years to the term of natural life.

The former convict ship is massively built throughout of solid Burmese teak, 100 feet long for the deck, to deck, has no general deck, the main deck is 135 feet long with a beam of 30 feet. Her solid sides are in places two and a half feet thick. Her square cut stern and quarter galleries stamp her at once with the hallmark of antiquity. Her slender legs and bows show that she could never distinguish herself with speed, pains were taken to make her trim and smart. Remnants of great gilded scrollwork on the sides of the vessel have been brought to light. Raised high above the deck, the anchor and cable bears at its extremity a symbol of innocence and beautiful womanhood in an original figurehead of exquisite design.

The vessel, a queer looking craft, strongly reminiscent of bygone days, is fitted with cells throughout. The cells on the lower deck, strong and gloomy, were used for the worst type of criminals. The vessel consists of three decks in all, a top deck, "tween deck," and a lower deck. The lower deck is 135 feet long with a beam of 30 feet. Her solid sides are in places two and a half feet thick. Her square cut stern and quarter galleries stamp her at once with the hallmark of antiquity. Her slender legs and bows show that she could never distinguish herself with speed, pains were taken to make her trim and smart. Remnants of great gilded scrollwork on the sides of the vessel have been brought to light. Raised high above the deck, the anchor and cable bears at its extremity a symbol of innocence and beautiful womanhood in an original figurehead of exquisite design.

Raised high above the deck, the anchor and cable bears at its extremity a symbol of innocence and beautiful womanhood in an original figurehead of exquisite design.

"Have you ever noticed how many fools there are in the world?"

"I have. And I've noticed something more. Everybody thinks there are a lot of fools in the world, but the queer part of it is there is always one more than any one person notices."

The first apple trees in British Columbia were planted about 1850, but not until after the completion of the Canadian Pacific Railway in 1886 were there many trees planted for commercial orchards.

Spain's new agrarian law will cost the government nearly \$10,000,000 next year.

## Trading Business Brisk

### One-Legged Man Gets Right Shoe For Left Ones

Accustomed to shoes for the left foot of Otto Wulberg, of Maumee, Ohio, who lost his left leg in an accident 15 years ago, has prompted him to search for trades.

A Maumee newspaper recently reported a story that Wulberg wished to trade his shoes for right ones. Newspapers throughout the country reprinted the story and Wulberg has received letters from many persons offering to "swap."

Wulberg has left shoes to persons in Washington, Kansas, Missouri, Oklahoma, and Wyoming, and return has received right shoes.

### Famous Tree Felled

#### Great Of South Africa Was Destroyed By White Ants

Durban has lost its famous red milk-wood tree, which was 200 feet, 10 feet high, and possessed a trunk diameter of 15% feet. It was felled by axes and a chain saw in the recent电报, but because it had been attacked by white ants, which had eaten it until it was a danger to the neighborhood.

How old it was nobody knows, but, at least, it was in test when the earliest explored route to Natal, and had stood in the same spot in South Africa ever since Durban came into being.—London Sunday Pictorial.

### Some Great Walkers

#### Record Of Their Journeys Would Have Been Interesting

The late Dan O'Leary covered more ground than the poet Wordsworth, who, according to De Quincey, traversed a distance as far as seven and a half times the world. Irish walker's scores in each have been 300,000 miles. To the exercise the poet, says De Quincey, "was indeed for a life of unclouded happiness and for much of what is most excellent in his writing." The Irish walker's record of 300,000 miles, he could claim equal happiness, for he was the soul of good nature and had an active sense of humor, but he wrote nothing. Like his rival, Edward Payson Weston, he never kept a diary, but he did not need one. The walker, who was another great walker, the philosopher said when his walking days were over: "What I most regret is that I kept no record of my journeys. Never have I thought of making one, so much, indeed, have I been impressed by the health and long life of infatigable walkers."

Nowadays, when walking clubs are formed in every town, it is not unusual for a walker to keep a record of his journeys. What I most regret is that I kept no record of my journeys. Never have I thought of making one, so much, indeed, have I been impressed by the health and long life of infatigable walkers."

### One Penalty Of Civilization

#### No Matter Where People Go News Will Follow Them

It is one of the penalties of civilization that people are increasingly compelled to escape from. There was a time when during an ocean voyage one could escape from the wheel of things, forget that people were doing lots and lots of things which were of no real interest, in fact, were of no interest at all. Now, the passenger in a liner finds a newspaper on his breakfast table and the world is always with him. We had always imagined that one of the compensations of primitive life was the freedom from outside events. It seems that we were mistaken. At present the prisoners are called together and the news is read to them by the governor or the chaplain. And a further punishment is inflicted on the weak prisoners still in certain prisons to be supplied with a typewritten summary of world news which they can read in their cells.—London Saturday Night.

### Fertilizer Well Analyzed

Practically no brand of fertilizer offered for sale in Canada for the past five years has escaped being analyzed at least twice in each institution, and the results are sold in this way. The Fertilizer Division gives assurance to farmers that the proper amount of plant food will invariably be found in their purchases of fertilizers.

### EVEN A PRINCESS' SOCKS SLIP DOWN

This unusual camera snapshot was taken as the charming Princess Elizabeth, daughter of the Duke and Duchess of York, alighted from her father's car to attend the Royal Tournament at the Olympia. The popular little personage pulls up her socks unashamed by the smiling crowd which witnessed the Royal party's arrival.

### Many Uses For Ammonia

#### Following Are Some Helpful Hints For Its Use

Try a solution of ammonia and water for cleaning your carpet. It will revive the colors wonderfully. When blackleading a grate, moisten the blacklead with ammonia, and you will get a brilliant polish.

Ammonia is good to clean windows. Add a little to the water and polish with a leather.

Braas which is tarnished will soon come clean if rubbed over with ammonia and water.

Always put ammonia in the water when washing blankets and woolens; it will prevent shrinking.

Wash your hot-water bottle regularly with ammonia and water. This will keep the rubber from getting brittle.

If you spill some red ink, apply ammonia and water and then wash in milk.

Paint can be removed easily from clothes with a mixture of ammonia and water.

Ammonia is excellent for making grease, so put a little in the water when you wash your brush and comb.

Should you upset an accumulator in your car, wash it immediately with ammonia.

If you want to make some smelling salts at home, put a few small pieces of rock ammonia in a glass-stoppered bottle and cover with eucalyptus. Keep well corked.

### Victorian Order Of Nurses

#### Miss Elizabeth Smellie Appointed Honor Consultant For Ontario

Honor Consultant for Ontario of the Victorian Order of Nurses of Canada, has been appointed honorary consultant in public health nursing to the Ontario Department of Health, according to an announcement in the current issue of the Canadian Nurse. This appointment, the first of its kind, is made, writes the editor of the official organ of the Canadian Nurses' Association, is in itself an official government recognition of the value of nurses as health counselors and the choice made by Hon. Dr. John Robb could not have been more fitting.

### Borrowed Tools

It is said, "old man," he said, "I understand that you are using Jones's saw?" The neighbor nodded.

"Good," said the first. "I'll let you borrow that occasionally. I'll let you use his ruler whenever you may be wanting it."

Little Man (at theatre): "I'm afraid you are in the wrong seat, old man."

Pugilist: "You don't need to be afraid. That is not unless you're thinking of making me move?"

A new fifty-passenger bus in Germany has wheels equipped with solid rubber elastic tires and can attain a speed of 46½ miles an hour.

### Construction Of Gaming Rooms In Cellars

Construction of gaming rooms in cellars has led to a revival of pin-up and bee-bee gun games for adult players, exhibitors pointed out.

Jig-saw puzzles still hold sway and the latest craze is chain the hundreds

new designs as the brain teasers will keep fans fitting pieces together for the next decade.

A 1933 bus in roller skates for

adults prompted a variety of new models in that division, exhibitors claiming greater speed and balance.

## Trade Agreement With France Now In Effect Is Expected To Prove Of Considerable Benefit

### Evading Meal Tax Levy

#### Caterers In British Columbia Reduce Price One Cent

British Columbia's latest tax levy, known as the meal tax, has imposed a heavy burden on the caterers and the provincial government in a generation. Hotel, restaurant keepers and representatives of the traveling public have been bitterly protesting against the tax, based on the grounds of in-constitutions.

The tax is five per cent on all meals served in public costing fifty cents or over. The immediate result of the tax was the marking down of all fifty-cent lunches and dinners to forty-cent lunches. The caterers would be able to dodge the tax and the caterers would be spared the inconvenience of making the extra charge and reporting to the government.

After several weeks' protest, the government is still holding out. The meal tax, which is applied to the meal, has not justified itself. The attitude of the public from the first has been hostile, and several formal protests have been made. In many instances, diners have refused to pay the tax, in which case the restaurants have done it.

So far, only one prosecution has been made for non-payment. A dinner on one of the Gulf of Georgia ferries refused to pay the tax on his lunch, was convicted and fined \$5 and costs.

The revenue from the tax is said to be negligible so far. In most restaurants where two or more people are dining together, the waiters make it a point to check the bill, and, if necessary, charge the tax, which the individual's meal did not cost more than 49 cents.

Mr. Stevens, the Minister of Finance, has said that the tax is to be established at 50 francs per 100 kilograms—that is to say, 5 francs for 100 francs per 100 kilograms, or about 1½ cents per pound.

The application of that rate is to be suspended up to September 23 to a sum of 25 francs per quintal, or 1½ cents per pound, which is a new quota to be established by agreement,

between the two countries.

French imports of Canadian salmon dropped from \$160,722 in 1931-32 to \$78,908 in 1932-33, so that a much improved effort in the near future is anticipated.

The Canada-France trade treaty, signed by both countries on May 12, and approved by the Canadian parliament on May 23, has been proclaimed effective. Unless renewed by tacit consent of the signatory countries, the treaty expires May 12, 1934.

Since the old trade agreement expired a year ago the two countries have been applying their respective trade policies to other products and the result has been that Canadian domestic exports to France, largely on that account, dropped from \$175,000 in 1931-32 to \$127,300 during 1932-33, or over 29 per cent, while imports from France declined from \$135,000 in 1931-32 to \$71,000, or over 45 per cent.

"That illustrates the value of agreements in promoting trade," said Hon. H. H. Stevens, Minister of Finance and Colonies, in the press conference on the new trade agreement. "We expect that under the convention, which now goes into force, our commerce with France will soon grow to its former volume."

The lowest effective tariff is granted on canned salmon. The provision in the agreement is that so long as the bill to modify present rates has not been put in force, canned salmon shall be accorded a reduction of 72 per cent, that is, 12½ cents per 100 francs per 100 kilograms—that is to say, 5 francs for 100 francs per 100 kilograms, or about 1½ cents per pound.

The application of that rate is to be suspended up to September 23 to a sum of 25 francs per quintal, or 1½ cents per pound, which is a new quota to be established by agreement, observes Mr. Stevens.

French imports of Canadian salmon dropped from \$160,722 in 1931-32 to \$78,908 in 1932-33, so that a much improved effort in the near future is anticipated.

### Flax From Pedigree Seed

#### King George Tried Experiment On Linen Farm Estate

Linens made from flax grown on the royal estates at Sandringham is to be placed upon the market. W. H. Gibson, director of the Linen Industry Research Association, told the Royal Agricultural Society that the association has long wanted to find a place where pedigree strains of flax could be propagated to the best advantage.

Until 1931 no such trials had been made for this purpose, but in that year the King visited an exhibition at South Kensington, and on the suggestion that Norfolk might prove to be a suitable county for raising pedigree flax, he welcomed the idea of an experiment in flax growing with pedigree and on a Sandringham estate.

This was the first Sandringham experiment, and while it was most successful, more success, than the association anticipated, the second Sandringham experiment of 1932 was 10 times as large as the first, and is now being entered upon with the determination, if the season is favorable to do much better.

### U.S. Grain Crop Is Poor

#### Believe Production Will Fall Short Of Domestic Needs

United States Government crop reports charging the severe damage by bad weather conditions to grain crop in 1932, indicated American production of the grain will fall short of domestic needs for the first time this century.

On the basis of its reports, it is estimated that 603,000,000 bushels is produced, while the United States uses from 620,000,000 bushels up to 640,000,000 bushels, depending on exports or shipments to territories and insular possessions, long an important factor.

The crop reporting board, noting severe damage done to the 1932 crop, which was already bad due to weather, estimated production of winter wheat at 341,000,000 bushels, well below average annual production. The board also reported spring wheat crop as "below normal."

"How much would you give for hair like mine?"

"I don't know. How much did you?"

A swimmer declares that nothing is thrilling as the first dip of the season. It certainly does take one's breath away, as a rule.

# ORANGE PEKOE BLEND "SALADA" TEA

"Fresh from the Gardens"

## World's Future At Stake

The World Economic Conference now meeting in London constitutes what is probably the greatest assembly of nations ever convened in the history of the world. In his opening address, Premier Ramsay MacDonald declared: "There is greater authority gathered in this hall than has perhaps ever been brought under one roof in the world's history."

Sixty-seven nations are represented in this momentous conference, or a large proportion of the world's national units are represented. The authority is vast. But it is not alone in the gathering that makes it outstanding in importance among all great world economic conferences; rather it is the fact that, for the first time since the Great War, it is composed of Government plenipotentiaries with the power to act.

As one well known economic authority points out, there have been economic conferences in the past ten years, but they were not composed of experts who had the power and authority to act. The present conference is quite different; it is made up of representatives of the Governments of all nations, clothed with authority to reach definite agreements, thereby committing those Governments to exert their power and authority to secure ratification of such agreements by their various legislative bodies. There is, therefore, hope that definite action will be taken.

Whether such action does result, says the economic authority already quoted, upon the answer to a fundamental question. Will the Governments really turn their backs on the ideal of national self-sufficiency, and try to rebuild prosperity on a basis of interdependence and mutual benefit in international trade, even though it means a marked departure from the present national policies? If so, then there is no reason why the Conference should not be great success. But, if not, there is little hope of preventing a drift into even greater depression, the ultimate outcome of which no man can forecast.

This is the crux of the whole matter, and it is in the questing attitude of the world's nations that the true test will be made. Will the countries and decide as though our respective nations were isolated units in the world? Then we shall fail and the world which looks upon us with expectation will have to drain a bitter cup of disappointment. Have we come knowing that the permanent good of each is dependent upon the permanent good of all, and determined to act in a spirit of co-operation? Then we shall succeed, and expectations of the world will be justified. We must not fail.

And His Majesty the King in opening the conference sounded the keynote when in a stirring appeal he said: "In the face of a crisis which all realize and acknowledge, I appeal to you all to co-operate for the sake of the ultimate good of the whole world. It cannot be beyond the powers of man to use the vast resources of the world to insure the material progress of civilization."

Surely it is inconceivable that the leading statesmen of the world, men clothed with all the responsibilities of government and whose very positions have made them fully cognizant of the underlying and fundamental causes of the present economic sickness, will be so nationalistically selfish, so negligent of their own and their countries' responsibilities to the world at large, as to take such irreconcilable attitudes that the success of the conference will be wrecked.

President Roosevelt in his stirring pre-conference appeal to the sovereign heads of all nations stressed the terrible responsibility that would rest upon them if they failed to act in a spirit of co-operation for the welfare of the world in their handling upon narrow nationalistic and purely selfish policies. He realizes, as Premier Ramsay MacDonald realizes, and as all sane and sensible people must realize, that a purely national economic policy in this modern world is one by which an impoverishing other nations, impoverishes those who pursue it. No nation can permanently enrich itself at the expense of others. The world must be made to realize that the success of the conference will be wrecked.

To quote Premier Ramsay MacDonald once again: "Nationalism in the sphere of politics may be essential to human freedom. Self-sufficient nationalism in economics is the death knell of advancing prosperity. The nearer we come to make the world an economic unit the better will it be for each nation. In any event, international co-operation is our best way to national recovery, and the nation which looks after itself in an international frame of mind will not only lead the world in enlightenment but in well-being."

Narrow nationalism must go. If it does not, the very nations which persist in it will themselves go—go down in the crash and debacle of a destroyed civilization. The present World Economic Conference is a turning point in the life of the present generation. The hope and prayer of the teeming masses of the world's population is that their leaders will rise to the occasion, and courageously and energetically take the right road.

### New Canadians

**Education Necessary In Order That They Should Know Something About Canada**

"It is too bad the government doesn't look into this matter. When you make application for naturalization papers, they should give you some literature so that you would know something about Canada."

Judge F. A. G. Ousley, hearing applications for naturalization in district court, made this observation. He regretted that something was not being done to help new Canadians secure their citizenship papers.

London will start its slum clearance shortly.

Bankruptcies in Egypt number about one-third those of a year ago.

### Nervous—Could Not Sleep

### Tired Out All The Time

Mr. George S. Milburn, N.B., writes: "I was very nervous all the time I slept at night, and felt tired out all the time."

A neighbor told me about Milburn's Heart and Nerve Pills, and as she was using them at the time she gave me some to try. I found they were doing me so much good I purchased two boxes and they proved of wonderful help to me."

### Freight Rate On Butter

**Move Made By Western Provinces For Better Consideration**

John C. Rutherford, president of the provincial dairy associations of Manitoba, Saskatchewan and Alberta will likely be taken shortly to obtain a reduction in the freight rate on butter shipments from the prairie to Vancouver and East Coast cities.

The move follows upon the rejection by the board of railway commissioners of an application for a reduction in the freight rate on butter shipments from the prairies to Vancouver and East Coast cities.

He has already communicated with officials of the three sister provinces to secure a hearing and is now planning a joint appeal to the board of railway commissioners for a re-hearing of the case.

### FAT MAN LOSES 63 lbs.

#### Kruses and Walking

"A man who weighs over two pounds can have the benefit of this man's experiences. He gives them to us for publication."

"In a little over twelve months I have lost 63 lbs. from a weight of 227 lbs. to 164 lbs., by taking a dose of Kruses Salt every morning for breakfast, and a dose of Kruses Salt every day. This remarkable achievement is all the more interesting when we consider that I was not in the habit of any form of dieting." —G. L. B.

You can take off with Kruses Salt. It is a natural salt which you can dip in hot water every morning before breakfast, modify your diet, and exercise.

While you are losing fat, you will be gaining in energy—in endurance—in mind. The old adage, "You can't work if you don't want to and you'll enjoy work and active recreation, and you'll sleep better, lose fat, and probably live longer."

#### Takes Opposite View

**French Academy Thinks Ships Should Be Called "Cattle"**

Trespassing on the domain of the Academie Francaise, the Academie de Marine has ventured to tackle a much-mooted question of the name of ships, writes the Paris correspondent of the London Daily Telegraph.

In England, where people do not seem to care about the number of humanistic objects it is nevertheless firmly established that ships have a right to the feminine pronoun. The French, who are much too logical to indulge in such personifications, take the ground that the words which mean ship ("navire," "vaisseau," "bateau") are masculine.

But while it may be perfectly satisfactory to talk about "the navire," it sounds very odd to speak of "the female bateau" ("la Bateau") when a vessel happens to have a feminine noun for a name.

The Academie de Marine therefore demands that the present practice should be placed before feminine nouns in order that "outrage against grammar, good sense and euphony" of prices—Fort Rowan News.

#### Dick Turpin's Coat

**Money and Jewels Found Recently In Linings Of Old Garment**

Money and jewelry have been found in the lining of an old-colored velvet coat which belonged to Dick Turpin, the famous highwayman.

The coat was recently bought by Mr. Rutter, of Cambridge, along with the medieval pistols and spurs which Dick Turpin is said to have worn at the Battle of Cambridge on Aug. 12, 1710, when he escaped from the Newgate runner.

He never claimed them before he was hanged at York on April 10 of the same year, and they passed to an execrable thief whose great-grandson is a Captain Mr. Rutter.

While Mr. Rutter was carrying the coat, a George I. half-crown, dated 1717, fell from the lining. Then the other articles were found, comprising: Six silver coins, two copper coins, a gold ring, two silver rings, and a pair of silver-gilt ear-rings.

#### Grows Larger In Canada

A new record for Loch Leven French is steadily declining, says Edmont Chais, president of the Touring Club of France. Once recently with the taking of one weight weighing 10 pounds 2 ounces in the Cypress Hills area, Saskatchewan, a weight several times that of the average for the species in Scotland, its original home.

Statistics and experience of the best Canadian farmers show that crop yields in Canada are, generally speaking very much below the possible maximum.

### Razor Blades FREE with POKER HANDS!

You can get these five keen, well-honed safety razor blades (fit any Gillette-type razor). Given free for just one complete set of Turret Poker Hands . . . any man would appreciate such a gift!

Mild, yet sweet and full of flavor—Turret Fine Cut is a particular favorite with men who "roll their own." A 20 cent package of this mellow Virginia Tobacco will make at least 50 cigarettes . . . in it are combined satisfaction and genuine economy.

### It pays to "Roll Your Own" with

SAVE THE POKER HANDS**

#### Would Only Benefit Few

#### Many People Would Suffer If Prices Were Increased

The United States and Europe are trying to combine so as to raise prices all round. If wheat were \$10 per bushel and everything else up in proportion, would the world be in any better position than if wheat were \$10 per bushel and everything else price proportionately? —G. L. B.

You can take off with Kruses Salt. It is a natural salt which you can dip in hot water every morning before breakfast, modify your diet, and exercise.

While you are losing fat, you will be gaining in energy—in endurance—in mind. The old adage, "You can't work if you don't want to and you'll enjoy work and active recreation, and you'll sleep better, lose fat, and probably live longer."

The French, who are much too logical to indulge in such personifications, take the ground that the words which mean ship ("navire," "vaisseau," "bateau") are masculine.

But while it may be perfectly satisfactory to talk about "the navire," it sounds very odd to speak of "the female bateau" ("la Bateau") when a vessel happens to have a feminine noun for a name.

The Academie de Marine therefore demands that the present practice should be placed before feminine nouns in order that "outrage against grammar, good sense and euphony" of prices—Fort Rowan News.

#### Wild Cattle In England

#### Unique Herd Maintained On Oldest Estates

It may surprise many people to know that there are wild cattle in England, and that they are found in some of the most ancient of the country's estates.

The animals are kept in the care of the keepers of the estates, who have a right to the services of the herd, and are paid for their services.

For centuries these animals have had their habitat in the Earl's woodlands, and 700 acres, which is about as many as can be found in the country, are allotted to the keepers.

The animals are fed on the grasses which are found in the woodlands, and the keepers are paid for their services.

(WNU Service)

Copyright by William Byron Howery

## CHAPTER XIII.—Continued

In a vague way he realized that the triumph was his now, if his heart had strength to bear it. Only he could rise to it, he could stand the Browning behind this nest and splatter every square inch of the bandit's covert. As he lay there, nearly helpless, fighting for his life, he had strength to rise and lay the machine gun, he heard Buzzard shouting at him across those seven hundred yards. He could not distinguish the frantic words; he thought Buzzard must be trying to ascertain him to his last, for, then he heard Joyce's voice, crying to him. Closer, vibrant with fear, the warning came to him clearly.

"Alan! Alan! He's coming for you! Alan! Stop him . . . Shoot him!" The panic and terror of those words roused Alan. He turned to see that some man was leaping upon him from those bandits. With a great effort he rose to an elbow, drunk with pain, giddy from loss of blood. A few seconds later he was on his feet and hastened to the water edge and laid his face and managed to tie a kerchief around his forehead wound.

The bandage stopped the blood from running down and blinding him; the cold shock of water drove the numbness away for a little time. Again he heard Joyce crying out to him, but now it was a cry insatiable, despair-stricken.

He cautiously raised his head, and saw the peril that his two friends had faced. The man who had been the red-banded leader had seen him collapse helplessly, and was coming across to put a bullet through his brain and seize the machine gun. Sinking back unseen, Alan drew his heavy revolver, aimed it and fired. He had aimed and waited. A few moments later, with his enemy within a dozen paces, he suddenly raised up, up above the shelter, shooting an rose.

The seven heavy bullets caught the bandit in the head, and he knocked him to the ground mortally. Crouching down again behind that pile of willow sticks and reeds, Alan turned to the Browning. Methodically he spread the tripod and planted it firmly and clicked it into its mount. Very carefully he took the gun and carried it to the edge of the earth bank, where it was caught. Rising to one knee then, clapping the spade grip, he cautiously raised his eyes above his shelter.

The breed with the deadly Savage, who had hidden those bullets into his body and had drilled Jimmy Montgomery through the heart, was trying to make it back to the flags. Shouting hoarsely, he kept jerking his head around to see what his enemy was doing. Alan swerved the Browning a few degrees, looked down the sights.

## TAKE ALONG A TIN OF MECCA ON HOLIDAYS

Don't let Sunburn, Whirlwinds, Palms, Tropics and Sunsets Bites and your heat exhaustion get you down. Mecca Ointment is sooths and healing skin irritations. No sunburn, no heat exhaustion, no bites. Mecca especially where there are children.

Our Ointment is made from the finest ingredients—25c. tins (16oz.)

Mecca Ointment

WORLD HAPPENINGS  
BRIEFLY TOLD

First air express to reach Winnipeg from New York arrived here June 12. A Northwest Airways plane made the 1,500-mile trip in 10 hours.

Public works, instead of direct relief, will be the Quebec government's unemployment relief program this summer. Premier L. A. Taschereau has announced.

Canada will be represented at the air mail poster competition to be held in Rome, Italy, Sept. 5 to 10, next, by two official delegates, F. C. Elford, Dominion Poultry Husbandman, and W. A. Brown, chief of the Poultry Division, Livestock Branch.

Sir Kingsley Wood, British Postmaster General, has issued a circular opening of the new Birmingham, Essex, head post office, said that only 38 mail bags were lost in transit last year, 40,000,000 having been carried by rail.

Increased preferences in the tariff on goods entering Canada and being sent from Canada and other parts of the British empire have just been enacted. The changes are expected to benefit Canadian trade to a considerable extent.

More than 500,000 persons visited the Canadian pavilion at the Royal London, Midland and Scottish Hallway between May 1, when she was placed on exhibition in Montreal and May 25, when she arrived in Chicago for the Century of Progress exhibition.

Increase of five per cent in all salaries paid by the National Councils of Canada, Limited, will be put into effect this month it was announced. Better business during the past few months and complete confidence in the future were given as the reason for the salary raises.

In an emphatic denial that the Dominion government would be asked to call an interprovincial conference to discuss the limitation of working hours, Premier L. A. Taschereau stated recently, that the question had not engaged the attention of the cabinet.

## Why Producers Are Poor

**Too Much Supply In Price Between Grower and Consumer**

A Goderich, Ontario, housewife bought a box of imported strawberries, for which she paid 29 cents. In the bottom of the box she found this note: "Please write me who made this up, and the price paid for it. We received 75 cents a crate of 24 boxes. Picked by Ruth Williams, Culman, Alabama, Ruth 9." The grower therefore received 29 cents for the box. The difference is 46 cents, or 56 cents duties (estimated at 15 per cent), transportation charges and profits for the chain of middlemen between the grower and consumer. No wonder primary producers are poor.—London Advertiser.

## Bannockburn Ark

**Famous Scottish Relic Is Offered For Sale**

London, Eng.—The Ark of Bannockburn is for sale.

Two days before the 619th anniversary of the battle, bids will be invited at Christie's for lot 33, the Monymusk Reliquary. It is the rectangular casket, 4½ inches wide, two inches deep and 3½ inches high, which Edward, the Arch of Arbrath, carried before the arms of Robert the Bruce. The casket contained the relics of St. Columba.

It is now the property of Sir Archibald Grant, an officer in the Grenadier Guards. In the possession of his family at Monymusk, Aberdeenshire.

## Fertilizers Analyzed

Owing to the activities of the markets and fertilizer division of the Dominion Seed Branch, practically no brand of fertilizer offered for sale in Canada for the past five years has escaped being analyzed at least twice in each inspection station where it is sold. In this way, farmers are assured that the proper amounts of plant food will invariably be found in their purchases of fertilizers.

## Awarded Battle Colors

Thirty-two years after the peace of Vereeniging, which brought the Boer War to a close, 26 units of the Canadian militia have now been awarded with the battle honor, "South Africa," to be embroidered on their regimental color. Announcement to this effect was made from the headquarters of the defence department at Ottawa.

## W. N. N. U. 1999

## Brain Development Of The Ape

**Learn More Quickly Than Humans At Early Age, But Advantage Rapidly Declines**

The story of a baby chimpanzee that showed greater learning capacity than its human infant, the infant son of Dr. W. N. Kellogg, of Indiana University, is made public in a book by Dr. Kellogg outlining the experiment.

The writer is associate professor on zoophysics. He placed the chimpanzee and his son under identical environment. They were identical clothes, ate similar food, played together, received equal attention and had the same toys. The experiment began when the boy, Donald, was 10 months old and the ape seven and one-half months old.

For eight and one-half months, Dr. Kellogg and his wife conducted learning, memory and co-operative tests in the two subjects. In all three departments the chimpanzee excelled.

But when the ape reached the age of 16 months, its improvement definitely declined, while the boy's ability continued to increase.

Dr. Kellogg says the most amazing feature of the experiment was the fact that "the ape, if given the environment advantages which the human child enjoys, develops many of the customary childlike ways of behaving more rapidly than the child itself."

Dr. Kellogg called attention to the fact that chimpanzee's life span is shorter than that of the child, and consequently it reaches maturity and full control of its powers more quickly.

## Scientists Honored

**Seven Delegates To Pacific Science Congress Given Degrees By British Columbia University**

Seven distinguished delegates to the fifth Pacific Science Congress were selected by the senate of the University of British Columbia for honorary degrees of doctor of laws and letters.

The following received degrees: Dr. Charles J. Gravier, professor of zoology, French National Museum, Paris; Professor G. L. Taylor, Yarrow Research Professor of the Royal Society of Canada; Dr. S. S. Shrivastava, Hatal, professor, Imperial University, Tokyo; Prof. G. Van Iterson, director of laboratory for technical education, University of Delft, Holland; Dr. G. W. Wayland, director of the Scripps Institution of Oceanography, La Jolla, California; Dr. H. M. Tory, chairman of the National Research Council of Canada and president of the Pacific Science Congress; Dr. Wen Hau Wong, director of the general survey of Peking, China, who was unable to attend the Congress.

## Modernizing the Navy

**Vacuum Cleaners Now Used For Scrapping Down Decks**

"I would have been home earlier, my dear, but my vacuum cleaner did not function properly."

No, you are wrong; it's the British sailor explaining why he is late.

It has just been announced vacuum cleaners have been issued to deck hands!

Surgeon Vice-Admiral Broad, medical director-general of the navy, has decreed the vacuum cleaner is more effective than the scrubbing brush which British Admirals of Ardmouth, carried before the arms of Robert the Bruce. The casket contained the relics of St. Columba.

It is now the property of Sir Archibald Grant, an officer in the Grenadier Guards. In the possession of his family at Monymusk, Aberdeenshire.

The theory that it is an ill-wind which does no one good is illustrated in the fact that since the stock market has been lifeless in Canada has increased by \$2,200,000. The insurance department's latest figures for the past three years disclose that in the same time, \$2,000,000 of insurance lapsed or was surrendered.

These figures make the policies of persons unable to pay the heavy premium. Insurance is now in force total \$6,500,000,000 in Canada.

## Retired For Instructions

"You remember when you cured my rheumatism a couple of years ago? I asked you to tell me what I should avoid dangerous?"

"Yes, that's right," replied the doctor, approvingly.

"Well, I've come back to ask you if I can take a bath now?"

She: "This is an ideal spot for a picnic."

He: "It must be. Fifty million insects can't be wrong."

## THE CHRONICLE, CHAMPION, ALBERTA

By Ruth Rogers

UNDoubted SLIMMING LINES AND CHIC

Suitable for normal as well as large figures.

Seldom is a dress so smart and so trim as at the same time.

It has a subtle air of youth. It's the fascinating old-fashioned rever collar which is the secret of its success to them was that of a London merchant, who obtained £18,800 for a sum of 270 pounds.

It's the original dress of black and white.

With the rever collar the rever collar was of white crepe silk.

The vest, belt and buttons also of white crepe silk.

The belt has a wide white band at the lower end of the rever collar.

The buttons are of white silk.

It's the dress in plain white crepe silk with white trim is designed for sizes 36, 38, 40, 42, 44 and 46 inches.

Size 36 requires 3½ yards of 36-inch material with % yard of 39-inch material.

Price of pattern 20 cents in stamp or coin (coin is preferred). Wrap coin carefully.

## CANADA'S CASE IS PRESENTED AT CONFERENCE

London, Eng.—In precise terms Prime Minister R. B. Bennett submitted Canada's case before the world economic conference. He pressed for concerted international action to raise the world level of wholesale prices.

But this alone would not solve the immediate difficulties of the producers of primary products, he told the conference. The export of over 350,000,000 bushels of wheat could be dealt effectively with only by international agreement involving a possible reduction of acreage sown to wheat until the abnormal carry-over stocks had been disposed of much action.

Prime Minister Bennett described as "most reassuring" the statement of Nevill Chamberlain, Chancellor of the British Exchequer, that the world's greatest wheat-importing country recognized the necessity of such action.

The conference, however, was in substantial agreement, said Mr. Bennett, on these points:

(1) The general level of wholesale prices must be raised.

(2) An international monetary standard should be restored as soon as possible.

(3) Consistent with the national economic system, the channels of trade must be cleared.

The real problem, Mr. Bennett declared, was how could these ends be achieved.

The Prime Minister opened his speech on the world economic conference by indicating how Canada, although relatively small in population, had achieved a position of world importance. In 1932 she attained fifth rank among the exporting countries of wheat. Exports being exceeded only by those of the United Kingdom, the United States, Germany and France.

Canada therefore was deeply concerned with the outcome of the conference.

Canada was agreed, the Prime Minister continued, that the monetary and economic aspects of the depression were inseparably interwoven and that a solution must be sought by a similar action.

"On the monetary side we are wholeheartedly in agreement with the program outlined by the Chancellor of the Exchequer of the United Kingdom," said Mr. Bennett. "I wish, however, to stress a few points. The program which we believe should receive even greater emphasis than he gave to them.

"In the first place I wish to urge with all the power at my command that the two greatest trading and credit centers, both at the conference should at the earliest possible moment reach agreement upon a de facto stabilization of their exchange rates."

"I am aware how exceedingly difficult this may be under existing conditions but it is clear that without such agreement this conference will fail in the purpose for which it is called. The United Kingdom and the United States must agree to stabilize their currencies in relation to each other. The only monetary price-raising policy can be agreed upon, in relation to the gold franc."

"The ratios originally selected may be provisional, but they should represent so far as may be ascertainable the real exchange value of the respective currencies as determined by the relative price structures and the balance of payments."

"Such a program could be progressively extended to other smaller countries."

"As one of the smaller countries whose economic life has been seriously affected by erratic fluctuations in the world's basic currencies, Canada can only hope to maintain the value of the dollar on a stabilized basis in London and New York until these two centers agree to establish a stable relationship between their currencies."

Excessive stabilization was the immediate necessity, but the world level of wholesale prices must be raised by concerted international action, the Canadian Prime Minister declared.

Visiting West

Ottawa, Ont.—Hector Charlesworth, chairman of the radio broadcasting commission, is leaving on a visit to western Canada to get a direct examination of the broadcasting situation for the commission. It was announced here.

W. N. N. U. 1939

## Small European Nations Would Follow Mussolini

### It Big Powers Do Not Find Solution To Economic Problem

London, Eng.—The small nations of Europe have turned longing eyes to the United States as a possible bloc leader. After a day of discussion, it seems the pieces are aching on the international chess board into new combinations; the gold countries of Europe are getting together.

"Small countries, Great Britain and France fail to point the way out of the economic morass at the world economic conference," Emile Francqui, the veteran Belgian diplomat, told the Associated Press. "The small countries of Europe will cluster about one European capable of leadership—Mussolini."

"It does not foster sensible ideas for united action while the great powers are talking about civilization slipping over the abyss, but the small countries, the small nations, crying for leadership, will follow Mussolini."

## Overland Rates For Ships

### Apply For Hull Insurance On Ships Voyage From Vancouver To Regime

Vancouver, B.C.—Marine insurance agents are busily engaged in getting rates on hull insurance on M.S. Vancouver City for a voyage from Vancouver to Regime. No marine insurance company has overland rates for ships.

The matter was simplified when it was learned the Vancouver Merchants' exchange wanted rates on the big model of M.S. Vancouver City, which was installed in the exchange by the ship's owner, Sir W. W. Reid.

The model is to go on exhibition at the World's Grain Show at Regime and the exchange sought protection for it for the "voyage." This was obtained when it was realized it was not a full-grown vessel that was going to cross the mountains.

## Seeking Home In Canada

### Baroness From Austria Wants To Settle In Dominion

Montreal, Que.—Eager to find a Canadian home for herself, her Austrian husband and their two children, Baroness Von Ritschi will tour Canada this week or so, she said. The newspapermen who accompanied her to the World's Grain Show at Regime, and the exchange sought protection for it for the "voyage." This was obtained when it was realized it was not a full-grown vessel that was going to cross the mountains.

The statements of policy given by the conference by Neville Chamberlain, Chancellor of the Exchequer, and Secretary Hull were in accord on a wide range of issues, notably the urgent demand for reduction of the excessive tariff barriers blocking world trade, and the United States delegation particularly welcomed the decision of the international trading conference as a bright new prospect for the economic recovery.

On the English side, Baroness Von Ritschi divides her time between her husband's Austrian estate and her native Devonshire. She and her husband have decided to settle in Canada, and the Baroness is expected to find a suitable home. The baroness hopes to found an association of Canadian miniature painters.

## Pay Debts In Silver

### Twenty Million Ounces of Silver Received At Bombay

Washington.—Twenty million ounces of silver has been received at Bombay, India, by the United States as payment of the \$10,000,000 British war debt installment.

Great Britain, however, is responsible for its delivery to United States.

The state department also disclosed that the federal assay office in New York had received 2,600,000 ounces of silver from Italy, meeting its partial payment of \$1,000,000.

Twenty million dollars was received by the United States government at 50 cents an ounce, under the inflexible law passed recently by the special session authorizing Mr. Roosevelt to accept a maximum of \$200,000,000 in debt payments in silver.

### Win Sweepstakes

Ottawa, Ont.—Word of their drawing about \$20,000 in Canadian funds from a sweepstakes conducted by the government of Liechtenstein, a small country in the mountains of central Europe, reached Harry Breakell and his wife here. The sweepstakes ticket, on the English Derby, cost Breakell, who signed himself "Lucky," about \$1.50. He purchased the ticket from a chance acquaintance.

### Better To Perspire

Chatham, Ont.—If you are too hot to perspire—its sunstroke, according to W. H. Eggle here. No matter how hot the day is as far as humans perspire freely there is no danger of perspiration from the heat.

## MANY NATIONS ARE SUPPORTING TARIFF TRUCE

London, Eng.—The world economic conference is moving toward realization. More nations have joined the small powers, undecided over war debts and monetary stabilization, threatened progress of the world economic conference.

"Small countries, Great Britain and France fail to point the way out of the economic morass at the world economic conference," Emile Francqui, the veteran Belgian diplomat, told the Associated Press. "The small countries of Europe will cluster about one European capable of leadership—Mussolini."

"It does not foster sensible ideas for united action while the great powers are talking about civilization slipping over the abyss, but the small countries, the small nations, crying for leadership, will follow Mussolini."

The increase in the number of nations joining in the temporary tariff truce was not the only bright note. Not long after Prime Minister Ramsay MacDonald had announced his intention to leave the British Empire, Germany and France, he called—and the pisa was closed by Secretary of State Cordell Hull, of the United States, and amplified by Maxim Litvinoff, of Russia—for a temporary truce.

With the coming of the truce, the United States accepted the United States' acceptance of a payment of \$10,000,000 made by the United Kingdom in silver, and the atmosphere was lightened by President Roosevelt's invitation to Neville Chamberlain, Chancellor of the Exchequer, and representatives for a conference on debts, although the president made it plain only congress has power to make any revision.

War debts are barred from the conference, but the small powers, but following sympathetic declarations by Britain, Italy, Germany, Poland, South Africa and other nations that final settlement of war debts is essential to world-wide recovery, the conference did not fail to have been affected by the pre-debt plan of uncertainty.

The statements of policy given by the conference by Neville Chamberlain, Chancellor of the Exchequer, and Secretary Hull were in accord on a wide range of issues, notably the urgent demand for reduction of the excessive tariff barriers blocking world trade, and the United States delegation particularly welcomed the decision of the international trading conference as a bright new prospect for the economic recovery.

On the English side, Baroness Von Ritschi divides her time between her husband's Austrian estate and her native Devonshire. She and her husband have decided to settle in Canada, and the Baroness is expected to find a suitable home. The baroness hopes to found an association of Canadian miniature painters.

## ON TRADE MISSION

Hon. Thomas L. Kennedy, Minister of Trade and Commerce, Ontario, who has sailed for England to reorganize the Ontario office in London and to lay the foundations of a greater overseas market trade between Great Britain and Ontario.

## Canada's Foreign-Born Population

Saskatchewan Is Largest Number Whose Parents Are Not British Ottawa, Ont.—Out of a total population of 921,758 at the last census, Saskatchewan had 396,619 persons whose parents were foreign-born, 16,000 with Canadian-born parents numbered in, while 170,356 had Empire-born fathers and mothers, a report from the Dominion Bureau of Statistics says.

Ontario has the next largest number of residents with foreign-born parents numbered in.

The offspring of parents born foreign in the other provinces were: Alberta, 30,325; Manitoba, 239,781; British Columbia, 163,938; Quebec, 102,452; New Scotia, 13,657; Newfoundland, 7,321; Yukon and North West Territories, 1,281, and Prince Edward Island, 612.

## Car Hails Runaway

Toronto, Ont.—With the use of his runaway team, a papa hauled his son away from a school in a serious accident. When the team bolted, Oakley raced after them, drew in front of them and slackened his speed until he felt the tongue of the wagon against his car. He continued to retard his pace until the horses were slowed to a walk.

**BRITAIN MAKES PAYMENT TO U.S. ON WAR DEBT**

## May Meet At Rome

### Important Meeting Being Considered

#### By Four Governments

#### London, Eng.—

London, Eng.—An important meeting of the four governments—Sir Ernest R. Bevin, Minister of Foreign Affairs, Neville Chamberlain, Chancellor of the Exchequer, in a statement which acknowledged the "debt, pending final settlement."

Simultaneously the Chancellor stated formal debt negotiations between Great Britain and United States would start at Washington as soon as possible in accordance with President Roosevelt's request to the British remittance.

The United States accepted the partial payment the Chancellor declared, "without prejudicing the freedom of either government in subsequent discussions."

News of the arrangement was followed by the American delegation to the world economic conference and the Chancellor with high hopes that it might open the way for general discussions toward economic rehabilitation.

The partial payment, Mr. Chamberlain told an enthusiastic cheering house, will be made in 50 cents on the dollar, and constitutes the first payment of the United States toward the payment of the \$1,000,000,000 debt.

Labor and Liberal speakers, applauding the arrangement, joined Mr. Roosevelt in praising President Roosevelt for his acceptance of the scheme of payment.

"The difficult and delicate problem has been adjusted," the Chancellor announced in revealing the results of several days' anxious negotiations between London and Washington.

"It is a good augury for the success of the world economic conference and may prove to be the first step toward a general peace and stabilization of the whole of the world."

The Chancellor revealed that the British Government had hoped it would be possible for United States to accede to a request that the payment of the debt be postponed pending discussion of the war debts as a whole.

"They (the British government) maintained this hope up to a very recent date," said Chamberlain.

In the end it became clear that it could not be realized. They therefore had to decide upon their course of action in these circumstances as they found them."

The American delegation was conducted by Sir Stafford Cripps, Labor spokesman for "the realism with which he has faced the situation."

Sir Ernest R. Bevin, Liberal leader, expressed his "deep appreciation of President Roosevelt's action in acceding to the request, which was a profound relief to all."

It was indicated in the House of Commons that Great Britain's \$10,000,000 debt to the United States, which amounts to about \$7,000,000, inasmuch as it was tendered in silver at the rate of 50 cents an ounce, under which debt remittances were permitted until recent congressional authorization up to \$200,000.

## U. S. CHECKS UP ON THE WAR DEBT PAYMENTS

Washington—Europe paid a little more than eight per cent. of the \$144,180,000 war debt instalments and other countries immediately fell into line behind the United Kingdom to seek a review of the debt agreements from President Roosevelt.

After three days, the diplomatic representatives of the four countries called at the state department to present the decisions of their governments, until finally the line up of demands by five and probable defaults by three others. One nation alone—Finland—paid in full the instalment due.

In all, the payments—\$10,000,000 from Britain, about \$1,000,000 from France, \$1,000,000 from Czechoslovakia, \$25,000 from Rumania and the full payment of \$148,592 from Finland—totalled \$133,592.

From Poland, Yugoslavia, Jugoslavia and Lithuania defaulted. Similar action by Hungary, Latvia and Estonia was indicated.

Meanwhile, the debt controversy had its inevitable echo in congress, but this time it was a statement by Senator Borah, Idaho Independent Republican, supporting President Roosevelt's action in receiving partial payments.

"If the economic conference breaks down it will be due to the attitude of the debtor nations," Borah said. "They seem determined to make the debt the whole thing."

"They may wreck the conference, and if they do, the economic misery and loss which will ensue will be far in excess of any benefit they might secure by cancellation of the debts."

## Wheat Exports

### Considerable Increase In Exports Shown Over Same Period Last Year

Ottawa, Can.—Exports of wheat in May totalled 21,463,000 bushels valued at \$13,604,700, according to a report issued by the Dominion Bureau of Statistics. This compares with 15,645,000 bushels valued at \$9,259,000 for the corresponding month in 1938. The increase in quantity of 5,821,533 bushels and an increase in value of \$4,347,700.

The partial payment, Mr. Chamberlain told an enthusiastic cheering house, will be made in 50 cents on the dollar, and constitutes the first payment of the United States toward the payment of the war debts as a whole.

The British capital woke quite early one morning recently to find 13,000 French soldiers "invading" the city. Fortunately for the sleepy Londoners, it was a peaceful invasion and the Foreign Office knew all about it. Here we see a group of the 13,000 French ex-servicemen in the "Croix de Feu" marching in procession to Whitehall and the Cenotaph.

## The Long Trail

Coughs, Colds,  
Influenza and Grippe

I T IS BETTER THAN ORDINARY COLD MEDICINE, IT RELIEVES THE COUGH AND SOOTHES THE THROAT, IT HELPS TO GET RID OF FUTURE ATTACKS. A SPLENDID BLOOD AND BODY-BUILDING TONIC FOR BOTH YOUNG AND OLD WHO TAKE IT REGULARLY.

Price \$1.00

TAKE A FEW MINUTES  
TO LOOK OVER THE  
BIGGEST-VALUE LINE  
OF TIRES THAT EVER  
ROLLED A HIGHWAY

LIKE anti-knock gas in your cylinders, is a set of our Goodyear on your wheels. Yes sir, they travel. And travel at great speeds.

Why? Because they're made with Superbit cord. And because Goodyear leads in tread development.

Of course you know that prices are far lower this season. It's a good business to try to replace the last mile out of those old tires. Decide to see our Goodyear men. They're the tire finders. All-Weathers, Heavy Duty, etc.
